Food Grade gas products are available from **LINWELD** in bulk quantities.

Gases can be purchased in bulk and blended on site.

The Model 8525 is **LINWELD**'s most popular gas mixer specifically designed for mixing carbon dioxide in nitrogen for modified atmosphere food packaging. The 8525 features:

- Continuous gas analysis of the gas mixture.
- Infinite flowrate turndown from 0 to 750 SCFH
- Mixture range from 0 to 100% CO<sub>2</sub> in Nitrogen
- Gas mixer is placed in NEMA 4X stainless steel enclosure for protection from washdown fluids.
- Alarm systems to alert personnel when mixture has gone out-of-limits.

Contact your local **LINWELD** representative for more information about on-site gas blending.
