

CYLINDER CONTROL

LINWELD'S ONLINE ASSET TRACKING

WHAT IS LINTRAK?

LinTrak is a value added service provided for Linweld's customers. Utilizing the latest in barcode, mobile scanning, and internet technologies we are able to bring you information like you've never seen it before. Our drivers will scan delivered and returned cylinders and you will have access to this information, and more, from an easy to use web site.

WHY IS LINWELD INVESTING IN THIS?

We want to make it easier for you to do business with us. Too often a lack of information can cause conflict between gas customers and suppliers. We are investing in new technologies that will help us share information so that we may become a better partner. We believe you will find great benefit in this new value added service.

HOW CAN LINTRAK HELP YOU?

More accurate cylinder balances

A common cause for cylinder balance discrepancies are cases where cylinders delivered to you are returned on the wrong account number or by someone else who may have borrowed them. With this tracking service the correct account gets credit for returned cylinders.

Improved cylinder utilization

Quickly and easily login and view how many days cylinder has been on your floor.

Faster delivery confirmations

Delivery confirmation can now be retrieved quickly and easily over the internet with a few clicks of the mouse – 24 hours a day, 7 days a week.

Avoid expired cylinder problems

If you receive specialty gases with expiration dates, you can view reports including these expiration dates on the website.

Delivery and expiration alerts

Receive email alerts when specialty gases are about to expire or a specific gas type is delivered to your facility.

Track internal movements of assets

You will be able to create internal locations and track the movements of your assets within these locations by collecting data using mobile barcode scanners or a website.

MANAGING IMPERFECT INFORMATION IN THE REAL WORLD
